Working on e-waste and dry-waste collection, reuse and repair drives,
cleanliness campaigns and zero-waste awareness programmes.

SWARNA SISTA

APARNA MITTAL

ABOUT THE SPEAKERS & THEIR INITIATIVES

Ms. Neelam Bhardwaj, Former General Manager, Securities and Exchange Board of India (SEBI), is a Founder Member of Sakha Group, Anushaktinagar, a community-oriented initiative promoting awareness, informed choices and responsible practices through meaningful community engagement and practical initiatives. She is also a core member of Parivartan 360°, a group of like-minded volunteers working towards practical solutions to waste-management challenges through the principles of Reduce, Reuse and Recycle.

Ms. Chaula Solanki, Ms. Swarna Sista and Ms. Aparna Mittal are core volunteer members of Parivartan 360°, which has been pioneering grassroots sustainability initiatives in Anushaktinagar since 2017. The group's activities include e-waste and dry-waste collection, reuse and repair drives, cleanliness campaigns and zero-waste awareness programmes. The group's initiatives include 50+ cleanliness drives, 40+ awareness programmes reaching 10,000+ people, and significant efforts towards recycling and reuse of e-waste and household discards.

Abstract:

As part of the HBNI Programme on Swachhata Hi Seva, this thought-provoking session focuses on waste management and practical sustainable living, highlighting simple and responsible actions that can create meaningful environmental impact.

The session will introduce the principles of: 5Rs + 1S + 1P

- **5Rs:** Refuse • Reduce • Reuse • Repair • Recycle
- **1S:** Segregation at Source
- **1P:** Practicality

Participants will learn about different types of waste, appropriate waste bins and colour coding, and the journey of waste from our homes to its processing and disposal, with a special focus on waste-management practices in Anushaktinagar.

The session will also highlight the environmental impact of improper segregation and explore simple, practical solutions that individuals and communities can adopt in their daily lives.

The larger objective is to move
"From Waste Disposal to Waste Responsibility"

Sustainability begins at home.

Together, we can make Anushaktinagar a model of responsible and sustainable living.

TOGETHER, WE CAN
CREATE A BETTER
TOMORROW.
