## **STATEMENT BY AUTHOR**

This dissertation has been submitted in partial fulfillment of requirements for an advanced degree of Homi Bhabha National Institute (HBNI) and is deposited in the library to be made available to borrowers under rules of HBNI.

Brief quotations from this dissertation are allowable without special permission, provided that accurate acknowledgement of the source is made. Request for permission for extended quotation from or reproduction of this manuscript in whole or part may be granted by the Competent Authority of HBNI, when in his or her judgment the proposed use of the material is in the interests of scholarship. In all other instances, however, permission may be obtained from the author.

## **ACKNOWLEDGEMENTS**

The author sincerely thanks Dr. L. M. Gantayet, Director, Beam Technology Development Group for his encouragement and keen interest in my Ph.D. work. Sincere thanks are also due to Shri. D.P. Chakravarthy, Head, Accelerator & Pulse Power Division for his support and provision of experimental and computational facilities.

I express my sincere thanks to Prof. P.Satyamurthy for his guidance and keen interest and I gratefully acknowledge his painstaking efforts in going through the drafts. I also acknowledge the generous help/guidance given by my Co-guide Prof. J.K.Chakravartty. I thank Prof. Chakravartty's team that participated in the weld qualification studies.

I thank my wife, Sharada, without the cooperation of whom this work would not have been completed. She willingly took the extra burden of household work and made me free for doing the Ph.D. work.

I am greatly indebted to my colleague, Shri. Satendra Kumar and gratefully appreciate his kind and generous contribution in computational and experimental work, without which this work would not have come to the present shape. Sincere thanks are due to Shri. P.K. Swain, for his valuable help in generation of empirical formulas for estimation of input energy for different design parameters. I thank my colleagues Shri. M.R.Kulkarni and Shri. Shibaji Basu for their help during the experimental trials. I warmly appreciate the stimulating discussions with my colleague, Shri R.K.Rajawat. I thank Shri. A.S. Rawat and his team from Laser & Plasma Technology Division, for the provision of facility and staff for the measurement of collision velocity by Laser intensity measurement technique.

I extend my sincere thanks to Shri. Susant Nayak and Smt. Supriya Barje for the preparation of drawings and the sketches included in the thesis. I am also thankful to Prof. S.D. Kore, Indian Institute of Technology, Guwahati, for his help in literature survey.
